LED Studio

#### Chapter I Introduction

#### 1. 1 Features

"LED Studio", programmed and produced for LED by the Program Team of "LED Studio", is powerful, practical and easy to learn software for making or playing programs, supporting a range of formats, such as txt documents, doc documents, pictures (BMP / JPG / GIF / PCX...) and cartoons (MPG / MPEG / MPV / MPA / AVI / VCD / SWF / RM / RA / RMJ / ASF...)

## **1.2 Operating Environment**

Operating system
 Chinese/English Windows98/me/2000/NT/XP

## Hardware Configuration

Pentium 300MHz or above ROM: 64M Graphics Card: Standard VGA 256mode or above

## Related Software

Microsoft Media player compulsory OFFICE2000—in case of \*. doc files RealPlayer—in case of RealPlayer files

#### Chapter II Install and Uninstall

#### 2. 1 Installation

"LED Studio" can be easily installed, as shown below:

Put the "LED Studio" installation CD into the CD-ROM, The Installation Menu will automatically pop up. (if not, then select this CD-ROM, double click it with your mouse)Then select "Install LED Studio" to start the Installation Guide, as Shown in Figure 2-1. After that, simply follow the instruction on the screen. Note: This software is protected by a serial number. Please enter the correct serial number in order to process the installation. Please ask the products provider for the correct serial number.

After "LED Studio" software has been successfully installed, there will be a "LED Software" program group in the [Start] / [Program], then move to the "LED Software" under this program group, click to start. Also, there will be a "LED Studio" short-cup on your desktop: as shown

to the right: LedStudio. Also, you can start the program by double click on the icon.

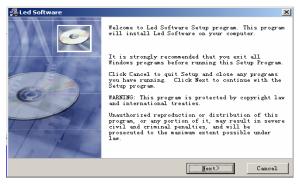

Figure 2-1

2

#### 2. 2 Uninstall

"LED Studio" software provide an auto-uninstall function, for your convenience to delete all "LED Studio" files, program groups and short-cuts, users can either select "Delete LED Studio" under the "LED Software" group, or go to the 【control panel】, select 【add/delete program】 to undergo quick uninstall. (Uninstall window as shown in Figure 2-2), now select "Automatic" can delete all files, program groups and short-cuts.

#### Chapter III Instruction in details

#### 3. 1 Consists of Program

Program (Program document) consists of one or more than one program pages. There are two kinds of program page: normal program page and overall program page. Normal program pages are the main components of a program, so there may be many, they will be played in order, one after another; there should be only one overall program page, played throughout the playing process. It is mainly used for fixed contents' broadcast, such as clock, company logo, etc.

Program page consists of one or more windows, which is used to show the contents that users want to play, like documents, pictures, cartoons, multimedia segments etc. There are twelve kinds of program windows: file window, text window, single line text window, static text window, table window, timer window, data base window, DVD/VCD window, external software window, date/time window, video line-in window, and geometrical graph window.

**File window**: can play various files like words, pictures, cartoons, tables, etc.

**Text window:** Used for quick inputs of short writings, such as notifies, etc.

**Single line text window:** to play single line text window, such as notices, adverts etc. writings.

**Static text window**: to play static texts, like company names, titles, etc.

Table Window: to edit and play table figures.

**Timer window:** for timing, supporting clockwise and anti-clockwise.

**Database Window:** To play ACCESS Database and ODBC Driver Database

**DVD/VCD window:** to play DVD/VCD

**External program window:** To insert external program into the play window, mainly used for small programs made by users.

Date/Time window: to display date and time

**Video line-in window**: to play signals from TV cards, Video Collecting Cards, etc.

**Geometric graph window**: to display geometric graphs like straight lines, circles.

## 3. 2 Interface Window Introduction

"LED Studio" software consists of two windows: play window and control window. (As shown in Figure 3-1)

#### 3. 2. 1 Play Window

Play Window (Namely the contents displayed on the LED screen) is to display the contents that users want to play, like files, pictures, cartoons, multi-media fragments. Here, the contents are the same as those on the LED screen, and also they are coherent. This software support several play windows (At most 99) working simultaneously, which means that one computer may control 99 LED screen at a time. In each play window, operations can be done separately, such as opening files, playing or editing files, and so on. And these operations don't affect each other.

#### 3. 2. 2 Control window

Control window is used for controlling the position, size and contents of the playing area, control window can be expanded to edit window. It contains Menu, Toolbar and Edit control: a control window with Editing is shown below:

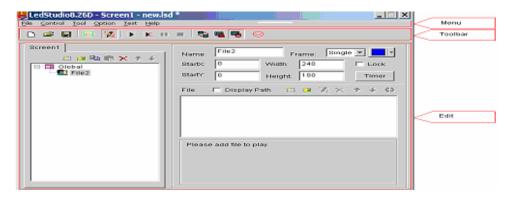

Figure 3-2

**Menu bar**: Including file, control, tool, setting, test (only for producer) and help, in total 6 sub-menus.

**Toolbar:** It is the fast operation of the menu functions.

**Edit:** consists of two parts, left hand side are program options, displaying info of the program and sub-windows; right hand side are control options, controlling the playing actions, time, etc. of the program.

## 3. 3 Features introduction

## 3. 3. 1 Menu

Include file, control, tool, setting, test (only for LED screen producer) and help, in total 6 sub-menus.

5

**File Menu:** as shown in Figure 3-3, include New, Open, Save, Save as, Open Demo File, Open recently used files and Exit.

New: for setting up a new LED Studio file.

Open: for opening a previously done LED Studio file.

Save: for saving current LED Studio file.

**Save as:** for saving current LED Studio file as a new LED Studio file.

**Open Demo File:** for opening demo LED Studio file, to process function demonstration.

**Open recently used file:** for opening recently used LED Studio files.

Exit: to exit LED Studio.

**Control Menu**: As shown in Figure 3-4, it includes play, play last, play next, pause, stop, notify, score manager, play PowerPoint file, stop PowerPoint file, play VCD/DVD, backup program and manager for LED Screen Sever.

Figure 3-4

Play: to play current LED Studio file.
Play last: to play the last program while playing.
Play next: to play the next program while playing.
Pause: to pause currently playing LED Studio file.
Stop: to stop currently playing LED Studio File.
Notify: to insert temporary playing notice.
Scare manager: for displaying the scores.
Play Power point file: for playing PowerPoint files.
Stop PowerPoint file: to stop the currently playing PowerPoint

Play VCD/DVD: for playing VCD/DVD files.

Backup program: to backup current program.

Manager for LED Screen Sever: to manage remote screen, please refer to chapter 17: network control, for details.

**Tool Menu**: as shown in Figure 3-5, it includes Word, Excel, Paint, Notepad, Calculator, etc. Single click on them can open programs

which coming with windows or pre-installed, to shortcut edit the program.

**Option Menu:** As shown in Figure 3-6, it includes: Screen combination/synchronism, Screen Brightness/Contrast/Color, Screen Area, Virtual/Real LED screen, Play Foreground/background, Lock/Unlock LED Screen Properties, Turn on/off LED Screen Power, Schedule Table, Schedule Hide Setup, Language, Show/Hide Play window, Software Setup, User Setup, etc.

Check IP Address: check your IP address.

**About LED Studio**: show the version number of the software and copyright info.

## 3. 3. 2 Toolbar

Toolbar is the fast operation of menu, as shown in Figure 3-14, from left to right the icons are: new, open, save, open/close display window, allow/forbid edit, play, play from current program, pause, stop, play background, lock/unlock screen, turn on/off screen power, and change look (change interface skin button), functions in details please refer to menu.

#### 3. 3. 3 Edit control

Edit control is the hard core of this software, illustration in details please refers to the next section: programming flow.

## 3. 4 programming flow

## 3. 4. 1 First step: setup the size of the playing window

The size of the window has to be setup correctly, otherwise when the program is done, only part of the Figure can be displayed on the screen or the Figure is not large enough.

How to setup: Menu--> Control--> Software setup--> Play window, can lead you to the software setup window. There, you can choose lock to LED screen (we strongly recommend you to do so, because the size and position of the playing window will be exactly the same as the LED screen); or you can choose Screen combination/synchronism, Floating.

Select Floating, Setup the display number as 1, and click "Update display number ", as shown in figure 3-15. Setup the start (X,Y) as (0,0), and setup the width and height according to your Screen, for example, your screen is 128\*92, setup (W, H) as (128,92).

ioftware Setup	×

Save Setup Close 帮助	

## 3. 4. 2 Step 2: Open a New Program page

Program page is a basic element of a program. In Figure 3-16, it is a program page toolbar, to open a new program page, just simply click on "new program page" button . (Note: if you cannot find the program page toolbar, please click on the button "allow edit" in the toolbar above). There could be infinity program page in the file, to delete a program page, you can use the delete button . If you want to change the playing order of each page, use the moving button , Normal program page will be played in order, while overall

 Normal program page will be played in order, while overall program page will be played continuously, without any time limits. (Such as time display)

E B Program Page1

Figure 3-16

## 3. 4. 3 Step 3: Setup program page option.

After a program page has been created or selected, you can setup the program page option, as shown in the Figure below. There are options like: name, playing time, background color, background picture, background picture effect, and background music.

## 3. 4. 4 Step 4: Create program windows

Program page is only a frame, which could contain as many program

windows as possible. Each program window can play different words, pictures, tables, cartoons, and videos, etc. In total, there are twelve kinds of program windows available. Click on the "create new program" button, a program selecting menu as shown in Figure 3-17 will pop-up. Now, we are going to introduce these 12 different kinds of windows.

#### Figure 3-17

**File window**: It is the most important window, because all supported files will be played here. You can add as many files here as you want. There are more 10 kinds of supported files, including: Document files (TXT), HTM/HEML/MHT files, EXCEL files, WORD files (DOC/RTF), all kinds of picture files (BMP/JPG/GIF/PCX/WMF/ICO), all kinds of media files (AVI/MPG/MPEG/WMV/ASF), VCD files (DAT), Flash files (SWF), RealPlayer files (RM).

Text windows, Single Line text windows, Static Document windows: These three windows are not compulsory. Words can be shown in the File window, such windows are only for providing simple words like title of a company, greeting captions, notes, etc. a quicker method to input. Table Window: Used to edit the play list data.

Timer window: Used for timing

**Database window**: Used to play ACCESS database and ODVC driver data base.

**DVD/VCD window**: Used to play DVD/VCD.

**External Program Window:** Used to insert external program into the play window.

**Date /Time Window:** Used to display date and time.

**Video line-in Window:** This window is used to display external video signals like TV, VCD/DVD, tape recorder, etc. This window requires video input cards like all variety of TV cards, Video capture cards.

**Geometric graphs window:** this is used to display geometric graphs.

## 3. 4. 5 Step 5: Setup Program Window options

All program windows has the same options as shown in Figure 3-18, Name, Frame, Position, Width, Lock, Timing. For program windows with different options, illustrations are list below.

#### Figure 3-18

**File Window:** as shown in Figure 3-19, the window has been divided into two parts. The upper one is the file play-list, while the lower one is the file options. Above the play-list, there is a file toolbar,

which can be used to add, delete or move files. The file options in the lower part various by different file formats, we will explain below.

#### 3. 4. 6 Step 6: Finish Programming

After the above 5 steps, a program has been done. If you want more than one program page, please repeat from step 2 to step 5. Please do not forget to save your program page after you finished. Click on the saving button  $\blacksquare$  or select menu--> save.

#### 3. 4. 7 Step 7: Play the program

To play the current program files, click on the button ▶ to start; ■ to pause; ■ to stop, or select from control menu. If you want to play a different program file, please click on the open button 🚔, to open a program and play it.

LED Studio

#### Chapter IV Character display

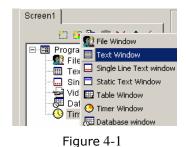

To play a document program, there are six methods: in a document window; in a single line text window; in a static document window; open the document in a picture and document window; Add words to the picture files and play in a picture and document window; or insert notice while a program is playing.

#### 4. 1 play in a document window

This window is not compulsory. Words can be displayed in a picture and document window, this window is only a quick way to key in simple words like company name, greeting caption, or notes.

#### 4. 1. 1 Create a new window

Click on the "new window" button as shown in Figure 4-1. Then select "Text window" in the menu to create a new text window, as shown in Figure 4-2.

## 4. 1. 2 Setup Text window

As shown in Figure 4-2, the upper part is for setting up program properties.

#### 4. 1. 3 Insert and edit text

As shown in Figure 4-3, the lower part is for editing texts. After clicking on the "add text" button, a "Text Edit" dialog box will appear as shown in the Figure 4-3 below. In the edit box at the bottom, you can key in or paste text. Also you can do type-editing, you can setup options like: Background, Font, Action, Speed, Staying time, etc.

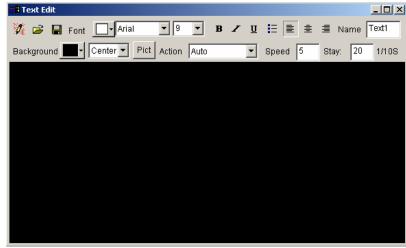

Figure 4-3

Close the "Text Edit" dialog box after finishing editing. Now the Text will appear in the list, as shown in Figure 4-4.

Text	۲D	We	$\mathbf{x}$	1	÷	
Text1						

Figure 4-4 If you want to make any changes to your texts, just simply select

them and then click on the button  $\mathscr{V}$ . An edit box as shown in Figure 4-3 will appear and let you edit the texts. To delete the texts, you can use the button  $\times$ . To change the playing order, use buttons  $\checkmark$  and  $\checkmark$ . Or you can preview the selected texts by clicking on the button  $\triangleright$ .

## 4. 2 Play in a single line text window

This window is only for single line sliding captions, such as greeting captions, notes, etc. These texts support transparent display, which can be added on any windows, including video files playing in video windows or in pictures and texts windows, as shown in below figure 4-5

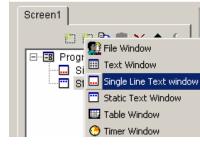

Figure 4-5

## 4. 2. 1 Create a new Single Line Text window

Click on the "new window" button i, and then select "Single Line Text window" in the menu to create a new single line text window, as shown in Figure 4-6.

Name:	Single Text2	Width:	Frame	None	
StartX: 2	.0	wiath.	144	_	Lock

#### 4. 5 Add texts onto a picture file

The text display method in this section is the same as that in Chapter 5, picture display, appearing and clearing texts. Details please refer to Chapter 5

#### 4. 6 Insert notes during playing

Instruction in details please refer to Chapter 16

Chapter V Picture display

## 5. 1 Create a new picture window

Click on the "New window" button *k*, and select "File Window" in the menu (as shown in Figure 5-1), to create a new file window, as shown in 5-2.

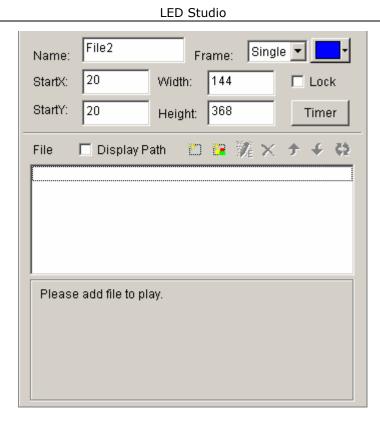

## 5. 2 Setup picture window

As shown in Figure 5-2, the upper part is for setting up program properties.

Name: program name

Frame: you can setup the width and color of the frame
Starting point X: x-coordinate of the starting point
Starting point Y: y-coordinate of the starting point
Width: setup the width of this program
Height: setup the height of this program
Lock: lock this program window to prevent it from moving.

## 5.3 Open playing files

Click on the "add file" button to open the file dialog box (as shown in Figure 5-3), select the picture format from the list. Then select the file that you want to open in the box above. (Once you select a picture, you can preview it in the right-hand-side frame.) Click on "open" to open the selected file, now the bottom-right corner of the main window will change, as shown in Figure 5-4.

#### 5. 4 Setup picture properties

The opened file has been added to the list. Now, options of this file will be listed below. (Figure 5-4), you can select background color, background picture, background picture drawing method, plenty actions, four effects, speed, staying time, clearing effects, clearing speed.

## 5.5Insert background picture, appearing music and texts.

#### Insert background picture

Click on the button in Figure 5-4, select and open the picture you want to insert in the "open file" dialog box. Also you may directly key in the address of the background picture in the edit frame.

#### Insert clearing music

Click on the Subutton in Figure 5-4, and select the music file that you want in the "open file" dialog box, then click "open".

#### Insert appearing texts

Click on the "TEXT" button in Figure 5-4, the "Picture/Text" dialog box will appear (Figure 5-5)

icture/Text	×
	Add
	Edit
	Сору
	Copy All
	Paste
	Delete
	MoveUp
	MoveDowr
	Exit

Click on "Add" button in Figure 5-5 to open "text edit" dialog box, insert the file that you want and setup their properties and effects, and then close the dialog box.

The Text file that you edited has been added to the file list, if you want to insert more than one appearing text, you can repeat the two steps above. To edit it, select from the file list and then click on the "edit" button to edit it. To delete it, use the delete button, you may also use move up, move down buttons to select files.

Click on Exit to finish the insert of appearing texts.

Chapter VI Cartoons display

## 6. 1 Create a new cartoon window

Click on the "New window" button 📴, select "File Window" in Figure

6-1 to create a new file window, as shown in Figure 6-2.

## 6. 2 Setup Cartoons window

As shown in Figure 6-2, the upper part is for setting up program properties.

#### Name: program name

## Setup table properties

Name: name of the datasheet

**Inquire:** select inquired datasheet (If you are familiar with the database well, you can define the inquired sentences.)

Action: come-out effect, speed, staying of the table

Row: Height of the rows in the table

Grid: select the color of the grid lines.

**Background**: select the background color.

Font: select the color of the table name.

**Title**: select Font, size, bold, italic or underline for the title of the table if it do exist.

## Setup column properties

All Columns has been listed to the left of Figure 9-6 you can select and make changes to them.

Name: Column name Width: Column width Align: Texts Align method Background: select the background color of this column Texts: color of the texts Font: select texts' Font Size: texts' size

**B** Z <u>U</u> Button: Whether use bold, italic or underline

Click on "Preview", you may preview the newly added table, click on "ok" to finish adding Access Database.

## 9. 3. 3 Edit Access Datasheets

Select datasheets that you want to edit from the database. Click on the "edit datasheet" button , appearing a "Database properties" dialog box (Figure 9-6), you may edit the sheet itself or columns in it.

## 9. 3. 4 Delete Access Datasheets

Select the Datasheets that you want to delete from the database, then click on the "delete" button  $\times$ .

## 9. 4 Add ODBC driver database

To add ODBC Database, some basic knowledge about database are needed, please refer to related books, we are not going to introduce here.

After click on the "Add Database" button a "select database" dialog

box will appear. (Figure 9-3) Select "Access database", and then click ok and choose the data source you want to open from the "select data source" dialog box. (Figure 9-7)

Select Data Source	? 🔀

Hour Minute Secon
Date Date Font Day Day Font
Figure 10-2

## 10. 3 Setup date and time

There are two kinds of date/time display, one is analog, another is digital. You may select one of them in display style. (Figure 10-2)

## Analog clock

As shown in Figure 10-3, it is the analog clock's plotting and properties settings. You can set exceed or lag time differences; Static texts and its font; color, size, shape, and font of the time display; color of the hour hand, minute hand, second hand; and also the display and color of the dates and days.

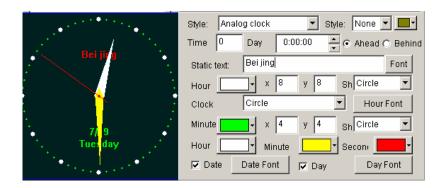

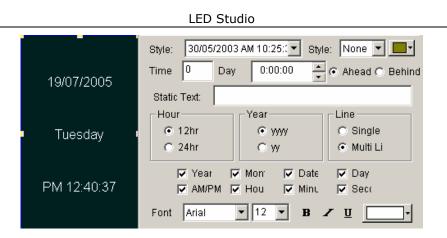

Figure 10-3

## **Digital clock**

As shown in Figure 10-4, it is the digital clock's plotting and properties settings. You can select the display style; set exceed or lag time differences; Static texts and its font; hour style; year style; single or multi line display; also the text font.

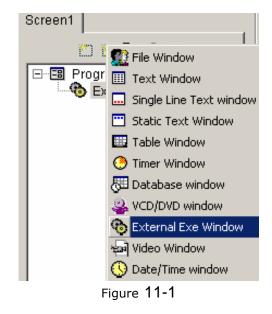

Chapter XI External Program

11. 1 Create a new window

Click on "New window" button 📴, and select "External Exe window" in

Figure 11-1 to create a new External Exe window, as shown in 11-2.

#### 11. 2 Setup external program window

As shown in Figure 11-2, the upper part is for setting up program properties.

Name: program name Frame: you can setup the width and color of the frame Starting point X: x-coordinate of the starting point
Starting point Y: y-coordinate of the starting point
Width: setup the width of this program
Height: setup the height of this program
Lock: lock this program window to prevent it from moving.

Name: StartX: StartY:	External2 20 20	F Width: Height:	rame: 144 376	Single	Lock

## 11. 3 Open external program

LED Studio

Click on the "Browse" button in the bottom of Figure 11-2, a "open file" dialog box will appear. Select the external program you want to open, here we choose Win2000 calculator program. Now, the main window will look like that as Figure 11-3

One application may contains more than one windows, all windows will be listed below. In this example, there are two windows: calculator and CalcMsgPumpWnd. Do not forget to select the correct window that you want to display. (Note: some of the windows can not be displayed)

Program Name:	
F:\WINDOWS\system32\calc.exe	Browse
Window Name:	
Calculator	
Calculator CalcMsgPumpWnd	
Top Margin: 0 Bottom Margin:	0
Left Margin: 0 Right Margin:	0

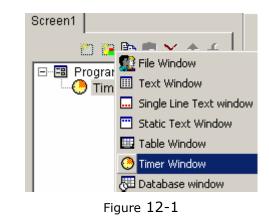

Figure 11-3

Top, bottom, left, right bounds can be used to cut the parts of an application which we do not want it to be displayed. In this example, display of the calculator in the playing window is shown in Figure 11-4.

Chapter XII Timer Display

#### 12. 1 Create a new window

Click on "New window" button **12**, and select "Timer window" in Figure 12-1 to create a new Timer window, as shown in Figure 12-2.

#### 12. 2 Setup the timer window

As shown in Figure 12-2, the upper part is for setting up program properties.

Name: program name Frame: you can setup the width and color of the frame Starting point X: x-coordinate of the starting point Starting point Y: y-coordinate of the starting point Width: setup the width of this program Height: setup the height of this program Lock: lock this program window to prevent it from moving. Background: Select background color and background picture,

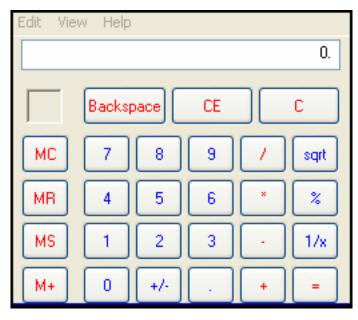

Figure 11-4

the background picture includes four kinds of drawing effects: Center, Stretch, Zoom, Tile.

Transparent: Setup the background whether it is transparent.

#### Chapter XV PowerPoint Display

# 15. 1 Play

Click on "Control", and then click on "Play PowerPoint File". Select a file to play. (Figure 15-1) When playing, it will automatically move the display area to the big screen. (Note: if alternatively playing between LED Studio and Led screen is needed, you may setup it in the repertoire; if you want to play PowerPoint in File window, you may use convert tools to convert PowerPoint Files to Flash Files. )

# 15. 2 Stop playing

Click on "control", and then select "Stop PowerPoint File. "

#### Chapter XVI Notify display

Notify Manager is mainly used to insert temporary notify into the program while it is playing.

# 16. 1 Open "Notify Manager" Window

Click on "control" in the main menu, and then select "Notify Manager". (Figure 16-1) A "Notify Manager" dialog box will appear.

Notify Manager	2
Screen: ALL SC 💌 PlayTimes: 🚦 🗖 Transparent	Play
Left: 0 Right: 0 Bottom: 8	Stop
A	Exit
×	
Action: Random 💌 Effect: None 💌	
Background: Speed: 60 Stay: 20 1/10S	
Font: Arial 💌 12 💌 🖪 🖍 🗓 🛄	
Figure 16-1	

# 16. 2 Setup Notify Manager Window

In Figure 16-1, you can select which screen that your notify is going to put; how many times it is going to repeat, whether it is transparent, left edge, right edge, bottom edge, action, background, font, etc.

# 16. 3 Play/Stop Notify Display

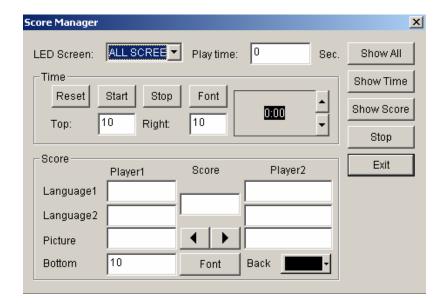

When everything has been set, click on "play" in figure 16-1 to broadcast the notify. Or click on "stop" to stop it.

#### Chapter XVII Score Manager

Notify Manager is mainly used to insert temporary notify into the program while it is playing.

# 17. 1 Open Score Manager Window

Click on "Control", and then select "Score Manager". A "Score Manager" dialog box will appear (Figure 17-1)

# 17. 2 Setup Score Manager Window

Scores display includes two different types: Time display and Scores display. Screen number indicates in which screen the display should

be; Time display indicates how long the display is going to be.

# **Time Display Setting**

Reset: Reset time to 0:00;

Start: Start to count;

Stop: stop counting;

Font: Setup Font and properties of the display texts;

**Top Edge**: setup the distance between the display time and the top edge;

**Right Edge**: setup the distance between the display time and the right edge;

# Scores display settings

Home: Scores for Home team, two display language available; Score: Score sign, such as ":";

**Away**: Scores for Away team, two display language available; **Picture**: one display picture for each team.

**Bottom Edge**: setup the distance between the display time and the bottom edge;

**Font**: setup the Font of the display texts; **Background**: Setup background color;

# 17. 3 Play/Stop Score

When everything has been set, click on "Show all" in Figure 17-1 to play time and scores. Click "Show time" to show time; "Show score" to show scores; or "stop" to stop showing time and scores.

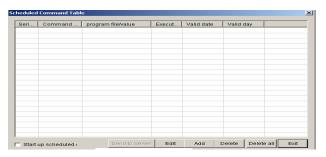

Chapter XIIX Playing Schedule

18. 1 open the schedule table

You may open the schedule table by click on the "option" on the main menu, and select "Schedule Table" (Figure 18-1), startup "Schedule Table" dialog box, as shown in figure 18-2.

#### 18. 2 Add Scheduled Command

# 18. 2. 1 Step1: Open "Scheduled Command" dialog box.

Click on the "add" button to open "Scheduled Command" dialog box. (as shown in Figure 18-3)

Scheduled Command			X
Command Properties:	Turn on LE	D screen power	
Program File:			Select
Execution Time:	13:16:31		*
Valid Date		Valid Days	
C Set date		O Set Days	🔽 Sun
Frc 2005- 7-19	~	Mon	V Tue
то 2005- 7-19	~	Ved Fri	🔽 Thu 🔽 Sat
		Ok	Cancel

Figure 18-3

# 18. 2. 2 Step 2: Setup Command list properties

**Command properties:** select command property, default setting is "Turn on LED Screen power"

**Program file**: this option only valid if the command is to: play program files, perform external program, play PowerPoint files. Click on "select" can let you select files.

80

**Execution time**: setup when the command starts

Valid date: setup valid date Valid days: Setup valid days

18. 2. 3 Step 3: Exit "Scheduled Command" Dialog box

Click "ok" to finish adding scheduled command. As shown in Figure 18-4, there is already a "Turn LED screen power" command in the list, if you want more than one command, repeat the 3 steps above.

Geri	Command	program file/value	Execut	Valid date	Valid day	
1	Turn on LE		13:16:31	Ignore	Ignore	

# 18. 3 Edit Scheduled Command

Select the command that you want to edit from the list. Click on "edit" to open the "Scheduled command" dialog box to edit this command.

# 18. 4 Delete Scheduled Command

LED Studio

Select the command that you want to delete from the list, click on "delete" bottom, if you want to delete all commands, use "delete all" bottom.

# 18. 5 Start up Scheduled Command

Click on "Start up scheduled", keep it remain selected to activate the schedule table, vice versa. (Figure 18-5)

Figure 18-5

18. 6 Exit

Click on "Exit" to finish the settings of "Schedule manager"

#### Chapter XIX Network control

#### 19. 1 Remote Manager (Online)

If you want to operate network control, you must setup the computer which controls the LED screen to remote control server, the other computers set as costumer computers. Remote control server can be controlled by all customer computers within the network. Customer computer may control all remote control servers within the network. If you want to carry out the remote control in the Internet, the remote control server must dial up, can't be by LAN, otherwise it can't be connected.

#### 19. 1.1 Setup remote control server

Select "Option" --"Software setup"—"Networking", and then enter to the "Software setup" dialog box. (Figure 19-1)

Select "Local Led screen" and "Remote manager (online)", and type in a non-used Port number (normally the default number 6600 will be fine). Customer computer must type in the same port number in order to link to the remote control server, and click "Save setup" to exist dialog box.

#### 19.1. 5 Send Program

By clicking on "Send program", you may enter the "Send program" dialog box, as shown in Figure 19-7. All files will be sent to the sub-catalog "PRGDATA" under the install catalog of the server. You may input objective catalog to create sub-catalog.

#### 19.2 Remote Manager (offline)

LED Studio

When sending program in long-distance (No LAN), adapting Remote Manager (online) to dial up is inconvenient, because the IP address is not fixed, and you must check the IP address when connecting it. However, the Remote Manager (offline) can deal with the inconvenience. If the company has its own website, and IP address of the website is fixed, client-side sends the programs to the website, and service-side get and play the program from the website through setting time.

#### 19.2.1 Setup remote server

Select "Option"—"Software setup"—"Networking", and then enter "Software setup" dialog box, as shown in figure 19-8; select "Local Led Screen" and "Enable Remote Server (offline) ".

Figure 21-4

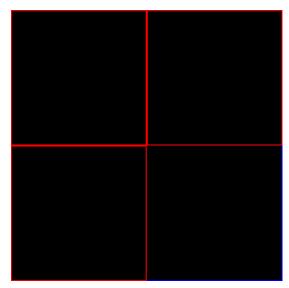

# 21.3 Setup Multi-display Combination

Typing in "Multi-display combination 1" in the name, and click "Add" to add a "multi-display combination setup", shown in figure 21-5. Setup the width and height of software Led display as (256,256), and start of hardware display 1 as (0,0), and start of hardware display 2 as (128,0), and start of hardware 3 as (0,128), then a play windows will appear after finishing setup, as shown in figure 21-6. Of them, there

are 3 red frames, standing for the play area for display 1, display 2 and display 3. Like the multi-synchronism, it can add multiple multi-display combinations.

Soft Screen	1		Hardware LED Screen	
Screen1			display 1 display 2	
Start X: 0	Width:	256	Start X: 0 Width: 128	
Start Y: 0	Height:	256	Start Y: 0 Height: 128	

#### 21.4 Setup multi-display Independence

Inputting "multi-display independence" in the name, and click "Add" to add "multi-display independence setup", as shown in figure 21-7. Setup software play display number as 3, and starts of software led display 1 and hardware led display both as (0,0); width and height of led display 1 and hardware led display both as (128,128); starts of software display 2 and hardware display 2 both as (128,0), width and height both as (128,128), and starts of software display 3 and hardware display 3 both as (0,128), width and height both as (128,128), then a play widow will appear after setup, as shown in figure 21-8.

 Cancel

#### 23. 2 Add user

Click on "Add User" in Figure 23-2, a dialog box like Figure 22-3 will appear. Enter the Username and Password. Then press "OK".

#### 23. 3 Delete User

Select an exist user from the list (Figure 23-2), (Note: Administrator can not be deleted) select "delete". A notice frame will appear, select "Yes".

#### 23. 4 Change Password

Select an exist user from the list (Figure 23-2), click on "change password" button. Enter the new password in the "Change password" dialog box, then press "ok".

#### 23. 5 User Authentication

If you tick the box before "Use password before start up", the next time the software starts up, User Authentication will be required.

# Chapter XXIV Frequently asked questions

#### 1. Warning: MCI systematic error when starts up?

This is because that Windows Media Player has not been installed, please install it. Find a file named: Mpsetup2K.exe (for Win2K/XP/ME) or Mpsetup98. exe (forwin98) in your CD-Rom. Double clicks to install.

# 2. Warning: cannot find LED screen system or transmission error?

This is due to the disconnection between the Serial Pot cable and the LED, or they are not well connected. Please check the cable.

#### 3. How to change the position and size of the play window?

To change the position and size of the window, you must go to software setup. Set the position of play window to "Any position", then enter coordinates and screen size. You may also use mouse to drag and change the position and size of the play window. For details, please refer to "Software Setup"

#### 4. How to run and play certain files?

Firstly, you should go to "Software Setup", and select all three options under auto -setup.

5. How to edit the existing files (. lsd)?

Click on "Open" button to open the file, and then select "allow edit" to allow you make changes to the files. For details, please refer to "Programming"
